Nationwide® Intelligent Underwriting

Available in all states except NY

Nationwide® Intelligent Underwriting streamlines the life insurance application process for both you and your clients. It can provide a faster and more efficient underwriting process with:

- Faster time to an underwriting decision
- Fewer attending physician statements and less need for additional underwriting requirements
- Accelerated process for some of the healthiest clients by eliminating exam and labs¹
- Less time spent on application paperwork, including the need for you to gather your clients' medical history

How does it work?

Completing the tele-interview

Option 1: After completing the electronic application please have your client call the phone number provided on the Medical Tele-Interview screen in iPipeline to complete the interview right away.

Option 2: While completing the electronic application, select the option to “schedule interview now,” and follow the prompts to electronically select a date and time window to complete the interview.

The interview will be recorded, and the client signs via electronic voice signature. Relatively healthy clients can expect an average interview time of 25 minutes, but time may vary significantly depending on client health and ability to provide detailed information on medical history.

Nationwide will notify you regarding additional underwriting requirements within a few days after completion of the tele-interview.

During the medical visit, the examiner may collect:

- Height, weight, blood pressure and pulse information
- Urine and blood samples

Setting eligibility expectations

For some of the healthiest clients, an underwriting decision will be made without the need for additional underwriting requirements.

Some of the healthiest clients will **not** be accelerated simply because we don't have enough information to make a decision. Therefore, additional underwriting requirements will be needed to reach an underwriting decision. Preferred and Preferred+ underwriting classifications are still available, even if clients are not eligible for acceleration.
